

# Local Makerspaces

## Local learning places accessible to all

### 01. ENABLE LEARNING FOR ALL THROUGH LOCAL BUSINESSES

Enable adults to access local facilities, equipment, and expertise through local makerspace initiatives (for a small fee). Businesses provide time slots to train and assist individuals in learning various industry-related techniques: laser cutting, 3D printing, electronics, mechanics...

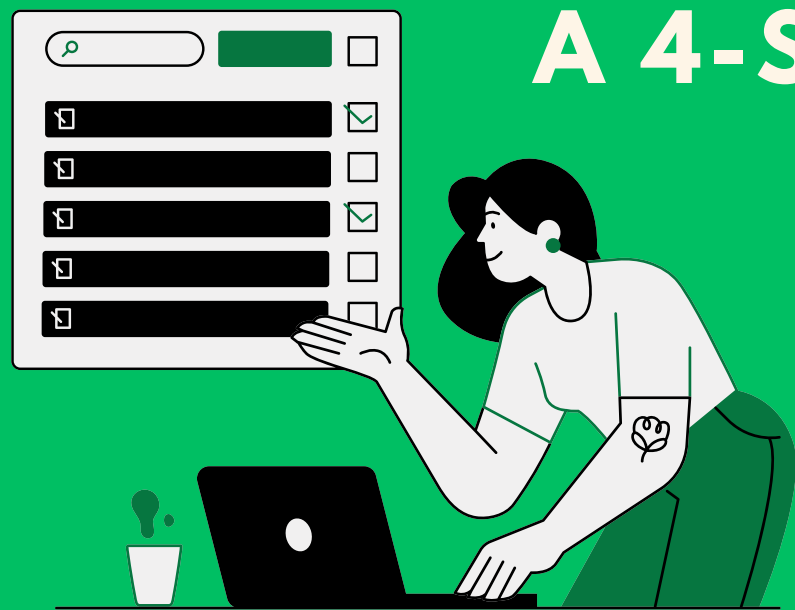

### 02. BOOST LOCAL BUSINESSES THROUGH CONNECTIONS AND TALENT DISCOVERY.

Enhance companies visibility within their sector and connect them with potential skilled employees. Foster dialogue among companies within the same sector to pool their skills and resources: environmental impact, waste reduction, resource sharing...

## A 4-STEP PLAN TO BRING THIS PROJECT TO LIFE

Scan this for a more detailed analysis of our project! (SWOT, RACI Matrix...)

#### ENSURE THE FEASIBILITY OF THE PROJECT

Check project's financial viability and insurance. Can association fund learning resources with fees? Are companies insured for on-site accidents?

#### CONVINCE BUSINESSES TO JOIN US

Engage with local businesses, showcasing the mutual benefits of joining forces.

#### MAINTAIN CONTACT BETWEEN BUSINESSES

Maintain inter-company relations through regular meetings among executives. Introduce newcomers.

#### MAKE OUR INITIATIVE KNOWN TO INDIVIDUALS

Promote our initiative to the public through our communication service. Use social media, partner companies, and rely on word of mouth.
